

# lumiere essence

At Lumière Essence we strive for perfection in everything we do. Beginning from bending stainless steel till choosing a stone in caves in Italy (Carrara, Lavagna, Finale Ligure) or the best quality of wood. All irregularities are a part of it's uniqueness.

lamp.C is hand built at our manufacturing plant in Wroclaw in Poland where cutting edge technology and traditional craftsmanship skills come together. With a view to level of service you would expect from Lumiere Essence we stay at your disposal in every moment to give the new life to your light:

# lamp.C

lamp.C breaks the schematic thinking about the lamp as an object with a big bulb. Small size of the lamp does not mean ineffective lighting nor cold unpleasant color.

Form of lamp.C bases on symmetry, using only the basic geometric figures: circle and cube. Developed with use of golden division rule. Return to classic forms was possible thanks to most recent technologies.

To complete an ideal form we used an infrared sensor to turn on/off lamp.C. In one gesture you create the light.
